

MODELS 424/O and 424/S - Door Lock Installation

PROCEDURE: (Refer to the illustration below)

1. Using two #10-24 x 1/2" tamper-proof screws and spacer washers, secure the catch to the two accessible bottom cabinet hinge holes on the handle side of the appliance. Locate the spacer washers between the catch and the cabinet sheet metal. Tighten the catch to a sliding fit.
2. Using the two #10-24 x 1/2" socket head cap screws and the hex key, fasten the lock assembly and housing to the bottom of the door through the two holes spaced 1-13/16" apart. **NOTE FOR 424/O ONLY:** Use the 1/8" spacer plate between the door and the lock housing.
3. Install the cam onto the lock using the #10 screw so that a clockwise rotation will lock the door.
4. Adjust the catch plate for a proper fit. Check the lock for proper operation. Tighten the catch plate screws.
5. Slide the lock cover into position and secure using two #10-24 x 1/2" tamper-proof screws.
